Easy-to-use, fully featured digital video surveillance solution for smaller budgets

Easy-to-use, highly reliable, plug-and-play, full featured surveillance solution

Kingston, ONT — Sentry Security Systems Inc released the Sentry LE-Lite Digital Video Recorder (DVR) on June 1, 2007. It supports from 1-8 security cameras and provides an extremely low cost, easy-to-use, highly reliable, excellent video quality surveillance solution for security dealers servicing smaller convenience stores, retail stores, fast food restaurants, and similar-sized businesses or facilities.

This Linux-based embedded DVR has no software on the hard drive to corrupt and cannot be attacked by viruses, providing maximum reliability. Operation can be accomplished using either an infrared remote controller (comparable to a TV or VCR), or by using a mouse and keyboard providing a comfortable “feel” for users with or without computer experience. In addition, these DVRs can be accessed remotely over the Internet or via a LAN. This ability to view live and/or recorded video from remote locations using a standard PC allows people to easily keep an eye on their premise(s) no matter where they are.

“The Sentry LE-Lite has been introduced to our LE lineup to provide our dealers with a quality, fully featured system for their customers with smaller budgets.” said Mike Demmons, Business Development Manager at Sentry. “The Sentry LE-Lite will open up huge opportunities for dealers and resellers by providing them with a low cost, extremely reliable, easy-to-use, excellent video quality surveillance solution for their clients.”

Advantages of a Sentry LE-Lite DVR:

- Full featured DVR at a very attractive price
- High stability and reliability for years of worry-free operation
- Excellent live and recorded video quality
- Simple plug-and-play installation
- Easy-to-use interface and operation
- Easy to use, fast remote access with high remote video quality
- No tapes to change – all video is recorded to a hard drive
- 50 days, 24-7 recording capacity (motion recording capability) before automatic overwrite
- **1 year free technical support, 1 year warranty on parts and labor**

“Our Sentry LE Series system has performed flawlessly and provided valuable video security evidence on several occasions. It provided detailed video evidence of a break-in that occurred during the night as well as catching a narcotics user who, while a clerk was verifying payment information, emptied a bottle of pills into her purse.” Dale McCleskey owner of a retail pharmacy store called Best Buy Drug Store.

An excellent add-on to a Sentry LE, LE-HC or LE-Lite video security system is the LE Data Capture. It can record and display transaction data from a POS System (cash register). The data from each transaction is then directly overlaid onto the video and a searchable database is created allowing abnormal transactions to be pinpointed on video. This device helps lower inventory and cash shrinkage, ensures a safer environment for employees, enhances loss prevention, and provides powerful search features to facilitate business management.
