Press Release

New Sentry Security Systems Inc. embedded DVRs provide unparalleled reliability for commercial applications

[KINGSTON] Sentry Security Systems Inc. is pleased to announce the release and availability of the Sentry RP and V Series of Embedded DVRs. These embedded systems cater to a wide range of commercial applications, offering a very high level of system stability and security against possible user alteration and tampering. Combining the advantages of a PC-based DVR with the architecture of an embedded platform, this new-to-industry design uses solid state memory to protect valuable operating system and DVR software offering unparalleled reliability and stability. Both Series of Embedded DVRs run on a Windows™ Embedded platform and are offered in a new, small form factor and extremely quiet case in up to 16 camera (hybrid capable) models. Models above 16 cameras are available in our standard cases as an upgrade.

"This product is totally new to our industry and truly provides the upgradeability and flexibility of a PC-based DVR with the reliability of embedded architecture. Sentry RP and V Series Embedded DVRs offer dealers a unique product with value-added features and benefits that are immediately recognized by their clients. This provides the dealer with a huge advantage over their competition and most importantly, a satisfied customer." Says Mike Demmons, General Manager at Sentry Security Systems Inc.

Key features of Sentry RP-IP cameras include the following:

- Small cube style case (8"x10"x13") allows for excellent cooling and a space saving design.
- Operating system and DVR software are installed on a solid-state drive, providing faster startup (up to 40% faster) and higher reliability.
- Built-in capture card cooler and shock-mounted hard drive.
- High degree of security against accidental alteration of system settings.
- Hybrid Capable (up to 48ch of IP video).
- Comes with the Sentry 3 year warranty and **free** remote setup
