

# Pike County School District

"Sentry Security Systems Inc. was able to provide us with customized systems for our schools and we were amazed at the ease of installation and simplicity of the DVR interface. The ability to have district level access to all connected systems is a big advantage in maintaining a high level of security within all of our locations. We are always happy with the affordable and expandable solutions that Sentry Security Systems Inc. provides us."

- Clayton Potter, Technology/Network Administration, Pike County District School Board

**Company:** The Pike County School District is home to 25 public educational facilities in Pikeville KY, comprised of 15 elementary schools, 2 middle schools, 5 high schools, 2 day treatment centers and 1 alternative learning academy.

**Challenge:** The Pike County School District required a surveillance solution that could be rolled out to their schools in an effort to increase safety for students and staff. They were looking for a reliable, easy-to-use system that could be customized for each specific location while providing seamless integration between schools.

**Solution:** Clayton Potter approached Sentry Security Systems Inc. with his districts situation in 2005. A Sentry representative suggested they use the Sentry V Series DVR paired with a variety of high resolution Sentry and Mintron cameras. The user-friendly interface paired with the ability to integrate and view all connected systems from one central location made it an excellent choice for their district. Having approached several different companies, Clayton decided to choose Sentry Security Systems Inc. based on the knowledgeable sales and support team and the value of the product offering.

**Conclusion:** The systems have had a dramatic effect on the level of safety and security at the schools. "We are extremely happy that we chose Sentry Security Systems Inc. for our schools surveillance. The service, support and products we receive always go above and beyond our expectations." said Clayton Potter. As a result of their success, Sentry Security Systems Inc. was named the Preferred Vendor of Security Equipment for the County in 2008.

With recent advancements in technology, the Pike County School District has started to implement Sentry Security Systems Inc. IP cameras to expand current systems and increase coverage using megapixel cameras.
