

Seattle Police Headquarters

"We've found the 4 channel SMD-04 Digital Video Recorder, to be an extremely reliable and effective tool in our bait cars. The system is easy to use, simple to install, very rugged and provides us with excellent video quality. We're able to keep a very low profile and be inconspicuous using covert cameras to capture automobile thieves. On behalf of the Seattle Police Headquarters, I would recommend Sentry Security Systems and their Mobile Digital Video Security equipment without hesitation." - **Detective Tye Holand**

Organization: The Seattle Police Department was established in 1886 and has evolved into one of the most well respected police agencies in the nation. In 2003, they became one of only a handful of agencies their size to be nationally accredited. The department employs approximately 1,200 sworn law enforcement officers and 700 civilian employees, all of whom provide quality service to Seattle's residents and visitors. Seattle remains one of the safest cities in the country.

Challenge: The Department needed a reliable mobile digital video security solution for their bait cars to assist in the observation and apprehension of automobile thieves.

Solution: Detective Tye Holand was researching over the Internet for possible solutions when he came across Sentry Security Systems Inc. After calling Sentry's toll free number, a Digital Video Security Specialist listened to Detective Holand's questions, concerns and requirements and suggested a Sentry SMD-04 mobile Digital Video Recorder and Mintron™ covert cameras.

"Sentry's knowledgeable sales and support staff combined with their high quality products made choosing a mobile surveillance system for our bait cars an easy decision."

- Detective Tye Holand, Seattle Police Department
