

S-5356IR: Dual CCD Camera

The Sentry S-5356IR camera features a dual CCD configuration that provides 480TV lines of high resolution video in color at normal light levels and switches to a black and white CCD under low light conditions providing zero focus shift. On standard single CCD IR cameras, if the camera is focused during the day it will appear out of focus at night, and vice versa.

Below is a table that demonstrates the difference between a dual CCD IR camera and a standard (single CCD) IR Camera.

Dual CCD vs. Standard IR Camera		
	Day	Night
Sentry S-5356IR		
Standard IR Camera
