- Color under normal illumination, B/W down to 0.02 Lux
- 23X Optical, 8X Digital Zoom
- Integral weatherproof Dome
- Compatible with Sentry DVR systems

Description

The Sentry PT23DN-AT-OD can track moving objects and send alarm signals with or without human interaction. It is an excellent camera for situations that require attended or unattended surveillance solutions.

Use this object auto-tracking PTZ camera to get detailed images. A hi-resolution Sony™ Ex-View CCD delivers 480TV lines of color at normal light levels, and switches to Black and White mode during lowlight situations providing an excellent minimum illumination level of 0.02Lux. It can be used indoors or outdoors because of its protective weatherproof dome. This camera is at the cutting edge of PTZ technology with 23X optical zoom, 8X digital zoom, 100 presets, multi dip-switch settable control protocols, and intelligent pattern tour. A keyboard/joystick controller is available and the camera can also be controlled from Sentry V, LE, R and SMD Series DVRs. The PT23DN-AT/OD provides cutting edge technology and a high degree of reliability at a remarkably competitive price.

Recommended for use outdoors (or indoors where environmental protection for the camera is needed) where CCTV video is to be produced in low light conditions as well as normal daylight illumination. The object auto-tracking feature makes this PTZ camera particularly suited for applications requiring both attended and unattended surveillance.

The object tracking feature allows this PTZ camera to track motion automatically, without human interaction.

The hi-resolution Sony™ Ex-View CCD combined with powerful zoom capabilities provides flexibility and detail.
