- Object Auto-Tracking and Auto Zoom Capable with Auto Focus
- Tracking Boundaries can be set
- Color in daylight, B/W in low light down to 0.01Lux
- 26x Optical, 8x Digital Zoom
- Cruise Tracking

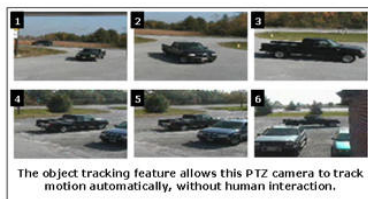

Description

The Sentry PT26DN-OD-OT PTZ camera can track moving objects automatically or manually. In auto-tracking mode, the camera can use the auto-zoom feature to maintain the original size of the tracked object in the field of view. Auto-focus is used to keep the tracked object sharp and this object auto-tracking, auto-zoom PTZ camera can be used to provide detailed images. A specific area in which the camera will track objects can be set.

A hi-resolution Sony™ Ex-View CCD delivers 480TV lines of color at normal light levels. An IR Cut Filter provides images in low light which can be enabled/disabled, providing an excellent minimum illumination level of 0.01Lux. The camera can be used indoors or outdoors because of its protective weatherproof dome. The EasyClip installation method is featured, meaning no tools are necessary.

The Sentry PT26DN-OD-OT PTZ camera is at the cutting edge of PTZ technology with 26X optical zoom, 8X digital zoom, 256 presets, multi dip-switch settable control protocols, intelligent pattern tour, auto-flip when tracking objects and on-screen-display menu. A keyboard/joystick controller is available and the camera can also be controlled from all Sentry Series DVRs. The PT26DN-OD-OT provides advanced technology and a high degree of reliability at a remarkably competitive price.

Cruise Tracking: While running a preset tour, the cruise tracking feature will detect motion and automatically switch to object tracking mode until motion has ceased at which time, the camera will continue its preset tour.

The object tracking feature allows this PTZ camera to track motion automatically, without human interaction.

The hi-resolution Sony™ Ex-View CCD combined with powerful zoom capabilities provides flexibility and detail.

Sentry PT26DN-OD-OT - Technical Specifications

Recommended for use outdoors (or indoors where environmental protection for the camera is needed) where CCTV video is to be produced in low light conditions as well as normal daylight illumination. The object auto-tracking and auto-zoom features make this PTZ camera particularly suited for applications requiring both attended and unattended surveillance.
