

Sentry's newest single door standalone controller kits offer a cost-effective solution for indoor and outdoor systems where PIN and/or Proximity credentials are required. These simple to install kits offer a user-friendly setup procedure, simplifying configuration and use.

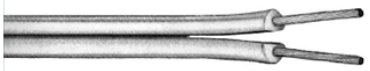

Features of the Sentry Single Door Standalone Controller Kit:

- Up to 500 user capacity
- Mounting template and installation kit are provided
- Includes security screw and security screw tool
- Internal Buzzer
- 3 User Security Levels: Normal, Secure and Master
- 3 Access Modes:
 - Normal: The door is locked until a valid PIN or Prox card is entered
 - Bypass: The door will unlock with the RTE button is pressed
 - Secure: Only Secure and Master Users can access the premises
- Internal Buzzer
- Programmable lock strike release time
